#### Learn about ECONYL®

ECONYL® regenerated nylon is made from waste rescued from landfills and oceans.

It can be recycled and recreated again and again.

## Announcing #MetropolisLikes NeoConnect Winners

Metropolis editors pick the best new products that launched virtually at NeoConnect.

by Metropolis Editors  
June 10, 2020

The Division Twelve Collection contains a colorful array of tables, chairs, and stools designed by Geof Lilge, Scot Laughton, and Samuel Petterson. Available in 20 different colors, all of the frames are 100% recyclable. The seats are crafted out of FSC-certified wood and bio-based foam.

As NeoCon exhibitors convene virtually through [NeoConnect](#), the conference's new digital hub, [#MetropolisLikes](#), our biannual product awards has been poring over submissions of the numerous online debuts. Of those, 35 innovative products earned a stamp of approval from our editors. Overall, this year's winners stand out for features that push boundaries of manufacturing technology, enable versatility, and embody sustainability more than ever before.

We were especially impressed by the number of companies continuing efforts to incorporate recyclability, bio-based materials, and carbon-neutral initiatives in their manufacturing processes. Products here also represent ways in which designers are reimagining the workplace from the greater flexibility of modular furnishings to the mainstream use of 3D printing.
