

KEILHAUER

RE: WELL v2 Features X 05 and X 06

September 15, 2021

This letter serves to outline Keilhauer product conformance with the requirements set out in WELL features X 05 and X 06.

WELL v2 Feature X 05: Enhanced Material Restrictions

Keilhauer restricts the use of heavy metals in all products. All Keilhauer components that constitute at least 5% by weight meet the following thresholds for material content:

- Mercury less than 100 ppm.
- Cadmium less than 100 ppm.
- Antimony less than 100 ppm.
- All standard Keilhauer components are free from halogenated flame retardants (HFR) and meet CAL 117-2013 without the use of chemical flame retardants. Furniture components therefore contain halogenated flame retardants at less than 100ppm.
- Textiles and plastic components may contain lead and polyfluoroalkyl substances (PFAS) in amounts less than 1000 ppm. Please contact sustainability@keilhauer.com for details.

WELL v2 Feature X 06: VOC Restrictions

Keilhauer products are tested per methods and VOC emission thresholds established in ANSI/BIFMA e.3-2019 (Credits 7.6.1, 7.6.2) for seating parameters. For additional information on specific products, please contact sustainability@keilhauer.com.

Additional Information

For additional information regarding environmental compliance and certifications of Keilhauer product not listed above, please visit www.keilhauer.com/sustainability or contact sustainability@keilhauer.com for more details.

Regards,

Joseph Palladino
